Objection to the Specification

A substitute amendment which complies with the double spacing requirement has been entered, therefore the previous objection has been withdrawn.

Relevant Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. EP 0395083 A3 (Sacchetti, et al.) Components and Catalysts for the Polymerization of Olefins.

Allowable Subject Matter

Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art of record fails to disclose whether the magnesium chloride is anhydrous α - MgCl_2 . The Examiner is relying upon Applicant's arguments for the patentability of the instant claims, specifically Applicant's argument that prior art of record do not provide anhydrous α - MgCl_2 based carrier containing titanium alkoxide and an alcohol having an x-ray diffraction spectra at the claimed regions and therefore does not anticipate or render obvious Applicant's composition of same. Comparing the examples given in the prior art to the instant application, the methods given are distinct and may result in substantial differences in the product made.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
